

disobeyed God, they became sinners, **separated** from Him (Genesis 3). Their children were then born *in Adam's image* (Genesis 5:3), not perfect but *sinners*. In fact, we all inherit this sin nature from Adam and are born into this world **separated** from God (Psalm 51:5; Romans 3:23, 6:23). This is why we need to be reconciled to Him (2 Cor 5:20).

How can we be reconciled? A righteous God *must* judge sin. And because of God's love for us, He took that judgment upon Himself - "*But God commendeth his love toward us, in that, while we were yet sinners, Christ died for us.*" (Romans 5:8). Now we are commanded to repent of our sins and trust in Jesus (Ac 20:21). It is through faith in Jesus alone (Eph 2:8) that we may pass from judgment "*in Adam*" to acceptance "*in Christ*" (1 Cor 15:22).

Is evolution fact or fiction? The evidence speaks for itself (Psalm 19:1-4) and it demands a verdict: "*For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse.*" (Romans 1:20).

Would you like to know more about "Creation vs Evolution" and how deeply this issue affects society and your life in particular?

# EVOLUTION

## Fact or Fiction?

### FIRST, CONSIDER THESE FACTS:

1. Natural selection is **NOT** evolution
2. Mutations are **RARE** and **HARMFUL**
3. There is **NO** biological mechanism to explain how evolution could occur
4. There are **NO** transitional fossils
5. There are **NO** "ape-men"
6. Evolution **VIOLATES** scientific laws (eg the 2<sup>nd</sup> Law of Thermodynamics)
7. The scientific evidence overwhelmingly supports **INTELLIGENT DESIGN**
8. "Creation vs Evolution" is **NOT** about "Religion vs Science"

# EVOLUTION

## Fact or Fiction?

### FIRST, CONSIDER THESE FACTS:

1. Natural selection is **NOT** evolution
2. Mutations are **RARE** and **HARMFUL**
3. There is **NO** biological mechanism to explain how evolution could occur
4. There are **NO** transitional fossils
5. There are **NO** "ape-men"
6. Evolution **VIOLATES** scientific laws (eg the 2<sup>nd</sup> Law of Thermodynamics)
7. The scientific evidence overwhelmingly supports **INTELLIGENT DESIGN**
8. "Creation vs Evolution" is **NOT** about "Religion vs Science"

Natural selection is **NOT** evolution. While natural selection is observed in nature, evolution is not. Organisms do change over time (e.g. as gene pools become geographically isolated) but these changes occur *within species* and are just a reshuffling of genetic information *already inherent* in the parent genes. Evolution requires that *new genetic information be added* so that one species may "evolve" into another with greater functional complexity, but in natural selection **NO NEW INFORMATION IS ADDED**. It is actually *lost* over time. Biological changes occur in the *opposite direction* to what is required by evolution!

If evolution were true you would also expect to see *transitional forms* in the fossil record, but even evolutionists admit the missing links are all missing. In his book *Evolution*, the late evolutionist Dr Colin Patterson, Senior Palaeontologist of the British Museum of Natural History, wrote: "*Most of the major groups of animals (phyla) appear fully fledged in the early Cambrian rocks and we know of no fossil forms linking them.*" When asked in a letter why he did not cite any transitional forms in his book, he wrote back: "*I fully agree with your comments about the lack of direct illustration of evolutionary transitions in my book. If I knew of any, fossil or living, I would certainly have included them... I will lay it on the line – there is not one such fossil for which one could make a watertight argument.*"

Likewise, all of the so-called "ape-man" specimens may be classified as either fully ape or fully man. None are halfway between apes and humans. Some have even been exposed as deliberate frauds.

Natural selection is **NOT** evolution. While natural selection is observed in nature, evolution is not. Likewise, all of the so-called "ape-man" specimens may be classified as either fully ape or fully man. None are halfway between apes and humans. Some have even been exposed as deliberate frauds.

Contrary to popular belief, **NO** scientific explanation for evolution exists. *Mutations* are rare and harmful. *Natural selection* occurs in the opposite direction. *Biogenesis* says living organisms derive only from other living organisms – life cannot arise from non-life. *Thermodynamics* says that systems tend toward increasing disorder, not increasing order. *Fossilisation* requires sudden burial, not millions of years. Clearly, the evidence overwhelmingly supports **intelligent design**: everything from the complex DNA in cells to the delicate balance of planetary orbits speaks of the precision and design of an intelligent Creator.

*Creation vs Evolution* is **NOT Religion vs Science**. Science uses the 5 senses to observe in the *present*. Hypotheses are tested by repeatable experiments, and are accepted if results are consistent. The question of *origins*, therefore, is beyond the realm of experimental science. How can you repeat or test the Big Bang? But in contrast to *the words of men* who weren't there in the beginning, *the Word of God* gives a first hand account from One who WAS there.

Dear reader, you are not the end result of millions of years of evolution. "*In the beginning God created the heaven and the earth.*" (Genesis 1:1). **There was no sin or death** – what kind of a God would create a world of death and suffering? God's creation "*was very good*" (v31). He created Adam & Eve "*in His own image*" (v27), in a **perfect paradise** in Eden. But this paradise was corrupted when Adam sinned: "*...as by one man sin entered into the world, and death by sin...*" (Romans 5:12). **Death only entered the world when Adam sinned** – it had not been occurring for millions of years. And when Adam & Eve
